SUBJECT: MIGRATORY BIRD CLEARANCE FOR THE B-1 USGS FLUME INSTALLATION
SITE - MBM - 090 - 95

On September 25, 1995, Ecology personnel performed a migratory bird nest survey in the proposed work area for the U. S. Geological Survey flume installation site upstream of Pond B-1. No migratory bird concerns were identified. This area, along with the previously installed flume sites, were previously cleared by DOE, RFFO for flume installation although the areas were in essential habitat or probable habitat for the Preble's Meadow Jumping Mouse. Wetlands issues were previously addresses with the Environmental Protection Agency. Should work at this site not start by October 9, 1995, the migratory bird clearance must be renewed.

Should you have comments or require further information, please call me at extension 3560.
